

# Reinforcing Update

Edition #2

## Welcome to our latest e-newsletter!

Keeping you up to date on the latest news, products and developments with OneSteel Reinforcing, in this issue we are offering FREE, our new REO BAR Gauge. Like our popular REO WIRE gauge, it makes checking products and specifications easy.

## NEW! FREE REO BAR Gauge

OneSteel Reinforcing has created the new rugged, pocket sized hard plastic REO Bar Gauge. This has been developed to help everyone involved with reinforcing steel to check key 500PLUS® REBAR sizes, either as loose bar or in our PREFAB, BAMTEC, REIDBAR or ROMTECH reinforcing solutions. The REO BAR Gauge covers N10, N12, N16, N20, N24, N28 and N32 rebar diameters.

## FREE REO WIRE Gauge

OneSteel Reinforcing now has fresh stocks of its popular REO WIRE Gauge. It lets you check key REOMESH square and rectangular sizes from SL52 through to RL1118 and also Trench Meshes in the 8, 11 and 12 ranges. And like the REO BAR Gauge, if you want to use it offsite too, it has a handy built in bottle opener.
